Code example - Implementing a feature for Ministry of Justice

WORKING WITH ME

- Over **11 years** of diverse industry **experience.**

- High-quality technical delivery: Don't take my word for it - you can **browse the dozens of publicly available pull requests** I've made for the Ministry of Justice: HMPPS accommodation service 2, HMPPS accommodation service 3.

- A test-driven mindset: Happy writing unit, integration and end-to-end tests and I understand when each option (if any) is appropriate.

- Navigating ambiguity - I'm comfortable taking the lead in gathering requirements, translating them into user stories and asking the right questions to the right people.

BIRD BYTE

CAREER HIGHLIGHTS

Here are some of the projects I'm proud of. Check my LinkedIn for my full employment history.

Senior Frontend Engineer @ Ministry of Justice (via dxw)

August 2023 - March 2024

I was the sole front-end developer working on a post-release accommodation service used by prisons across the UK.

I supported the service post-launch as the sole FE and contributed to the rollout to other regions, before taking my learnings to a sister project and helping that team launch in their first region.

NodeJS + TypeScript + ExpressJS

Software Engineer @ FutureLearn

April 2020 - November 2022

I worked across the ruby and typescript stack delivering features from front-end to back-end, database migrations, integration, and end-to-end testing.

One of the notable projects I contributed to was building a rich text editing experience, requiring backward compatibility across tens of thousands of articles.

Ruby + NodeJS + TypeScript + React

Senior Software Engineer @ Trainline (via YLD)

June 2019 - October 2019

I joined a team of developers and business analysts to migrate mobile and desktop applications from Adobe Analytics to Google Analytics. This project required a test-driven approach to ensure data parity between the analytic tools.

RxJS + NodeJS + TypeScript + React Native

Senior Full Stack Engineer @ Nexmo (via YLD)

October 2018 - June 2019

As part of a small cross-functional team, I helped improve new customers' onboarding experience, which **increased "first activity" from 16% to 45%**.

NodeJS + VueJS

Front End Engineer @ The Stylist Group

May 2017 - September 2018

I led and delivered multiple projects, including a new sign-up process that complied with GDPR and integrating Shortlist & Stylist sites into the AMP (Accelerated Mobile Pages) platform.

NodeJS + React
